Javier Bonilla
COMPUTER SCIENCE ENGINEER
javier.bv.paris@gmail.com • (857) 316-9670 • Ann Arbor, MI • GitHub • X • j4avier.eth

OBJECTIVE

I am a University of Michigan Computer Science graduate with hands-on experience in blockchain development, smart contract protocols, data engineering, and AI workflow and development. I am seeking a software engineering role where I can expand my knowledge in distributed systems and decentralized protocols, and increase my network within the blockchain industry.

PROFESSIONAL WORK EXPERIENCE

Solana Foundation **August 2026 – October 2026**
DevRel Solana Fall Course TA
- Preparation of assignments and tutorial material for students as repos/slides/websites
- Giving special lectures and running workshops for students
- Provided technical support to students, debugging Solana programs tracing failures to root cause and walking students through the fix

ReFi² **June 2026 – August 2026**
Business Development and Smart Contract Engineer Intern
- Protocol architecture design and development for GTM deadline and token launch
- Maintained partner, investor and business-development pipelines
- Organized internal workflows and tracked open action items ensuring commitments don't fall through the cracks

Moss & Associates **June 2025 – August 2025**
Data Engineering Intern
- Designed and managed data pipelines, leveraging Power BI and Power Apps to deliver actionable insights and business solutions.
- Pipelined data from internal business tools to the data lake via API and MCP server integrations.
- Developed AI integrations and custom chatbots tailored to branch-specific needs, enhancing data accessibility and operational efficiency.
- Supported enterprise data migration from Azure Lakehouse to Microsoft Fabric, enabling a more scalable and modern data architecture.

Gnosis **February 2025 – May 2025**
Intern
- Engaged in an AI development project focused on creating an autonomous agent capable of decision-making and placing bets on a Prediction Market.

PROJECT EXPERIENCE

Blockchain Development Projects
- **Agentic Commerce Platform (Solana Devnet).** ACP, an agentic commerce platform with a reputation system that charges users based on the actual API tokens used by an agent for its work. Uses an escrow and whitelisted oracle for payment in USDC. ACP
- **Over-Collateralized Lending Protocol (Ethereum Sepolia).** 120% over-collateralization enforced on loans. Liquidation incentivised as discounted ETH prices avoiding bad debt. Supports flash loans through smart contracts. OCLP
- **ZK-Powered Voting Platform (Ethereum Sepolia).** Built anonymous, one-time voting for verified users via Merkle tree commitments and zero-knowledge proofs, with on-chain result transparency. ZK-Voting-VercelApp
- **Decentralized Automated Market Maker Protocol (Ethereum Sepolia).** Enabled swaps between ETH and a custom token with 0.03% fee distributed to liquidity providers. DEX

Operating Systems
- **Multi-Threaded OS Library.** Implemented a multi-threaded OS library in C++ (using Boost), enabling secure parallel processing.
- **Advanced Paging System.** Built an advanced paging system supporting address-independent memory management.
- **Concurrent-Safe Filesystem.** Developed a concurrent-safe filesystem supporting multi-user file operations with networked access.

Ethereum Infrastructure
- Constructed an Ethereum staking node on a Radxa Rock 5b, deepening understanding of blockchain networks.
- Automated an AWS Prometheus/Grafana stack (Terraform, Ansible) alerting on Ethereum RPC uptime, latency and sync lag

Web Development
- Built a full-stack Instagram clone using a Python static site generator, server-side CRUD/SQL, and client-side JavaScript with REST APIs. Deployed on AWS.
- **Solana Course Site.** Created a site hosting my Solana tutorials, autograding challenges and providing admin and student resources. solana-school.com

EDUCATION

University of Michigan
Ann Arbor, MI • May 2026
B.S. in Computer Science
Minor in Physics

Solana Foundation Dev-Rel Summer Course
Remote • May 2026
10 Week intensive course with dev projects
Solana network certificate – Solana Foundation

SKILLS

Languages
C / C++	Expert
Python	Expert
Typescript	Expert
SQL	Expert
Solidity	Proficient
Rust	Proficient
JavaScript	Proficient
Noir	Proficient

Blockchain Tools
Anchor	Proficient
Pinocchio (Solana)	Proficient
ETH Staking Launchpad	Proficient
Nimbus	Proficient
Besu	Proficient
Hardhat	Proficient
Sepolia	Proficient
Token-ACL(Solana)	Proficient
Token-2022(Solana)	Proficient

Data & Cloud
Azure Data Factory	Expert
Power BI / Power Apps	Expert
Microsoft Fabric	Proficient
Docker	Proficient

Dev Tools
Node.js	Expert
React	Expert
GitHub	Expert
DevOps	Expert
Jira	Expert
MCP Servers	Proficient
Postman	Proficient
GNS3	Proficient

Monitoring Tools
Wireshark	Proficient
GNS3	Proficient
Graffana	Proficient
Prometheus	Proficient

Languages Spoken
English	Native
Spanish	Native
French	Conversational
Chinese	Basic

HOBBIES & INTERESTS

Member of the Michigan Climbing Team
Recreational Volleyball
Chess
Hiking and Outdoors
